

ALKALINE WATER IONIZERS

An ionizer is connected to your kitchen sink tap and uses ordinary tap water to produce alkaline water by separating the acidic component.

The **health benefits** from drinking alkaline ionized water are:

- The **alkalinity** neutralizes excess body acids responsible for many ailments.
- The water has a small hexagonal molecule structure to penetrate the body fluids for **easy absorption**.
- The water contains **anti-oxidants** to neutralize free radicals that promote body ageing.
- The water is **free from** harmful **chlorine and heavy metals** found in treated tap water.
- The water is concentrated with healthy **minerals**.

The water ionizer comes with up to 5 pH settings and is inclusive of a multistage built-in pre-filter.

Ionizers are obtainable from

Venus Pure Water

at affordable prices starting from R 3 900.
